QUALITY ASSURANCE STANDARDS

ABOUT JENKIN TIMBER

Jenkin Timber Limited is a large Family owned New Zealand company, recognised as a leading innovator, manufacturer and exporter of value-added finger-jointed and solid wood radiata pine products. In 1922 the philosophy of our founder, Harry Jenkin, was simple. *"You don't sharpen the tools you keep them sharp."* Today, staying sharp for Jenkin is still based on the original values established three generations ago; integrity, innovation and foresight.

JENKIN'S QUALITY ASSURANCE STANDARDS

To constantly deliver products that perform at the highest level, demands excellent standards of quality in every area of business: from the training of our people, to product improvement, to concern for the environment.

Jenkin Timber Limited is proud of our reputation for quality and integrity. A reputation that has been proven for generations. Our investment in quality is core to our company philosophy. Out of that dedication, innovation flows - and excellence continues year after year.

Our most recent certifications and standards are shown here. We will update these regularly. We strive to not just follow the strictest standards of our profession - but to keep ahead of them. That way you, our customer, know that whenever you choose a Jenkin product or service, you are choosing real quality.

BUREAU VERITAS LICENSE NUMBER 2648

Jenkin Timber has been granted the right to use the certification mark of Bureau Veritas New Zealand for finger-jointed structural timber in accordance with the requirements for AS/NZS 1491:1996, under approved quality system (QSR) based on the ISO9000 series of standards.
